## InfiNet Tipsheet: Configuring Microsoft Internet Connection Wizard for Windows98

1-937-

If you are using Windows98, it comes loaded with Internet Explorer and and Internet Connection Wizard. To start the wizard do the following:

- Click on "Start"
- Select "Programs"
- Select "Internet Explorer"
- Click on "Connection Wizard"

1-800-715-7873

### Internet Connection Wizard

- Click on the dot next to "I have an existing Internet account through my phone line or a local area network(LAN). Help me setup my computer to connect to this Internet account"
- Click on "Next"
- Click on the dot next to "Select this option if you are accessing the Internet using an -Internet service provider or a local area network (LAN)"
- Click on "Next"

### Setup your Internet Connection

- Click on the dot next to "Connect using my phone line"
- Click on "Next"

### Phone Number

- Click in the field "area code" and type in the area code of the InfiNet local access number for your area
- Click in the field "telephone number" and type in the InfiNet local access number for your area
- \*NOTE\* If you do not know the local access number for your area please call InfiNet at 1-800-848-4638
- In the field "Country name and code", select "United States of America (1)"
- Leave the check in the box for "Dial using the area code and country code"
- Click on "Next"

### User Name and Password

↓  
BASSMAN  
lower case  
small letters

- In "User Name", type in your Network Login from your customer information sheet. example:  
p0000
